

PUBLIC NOTICE

REPLACEMENT OF OLD HIGH MAST LIGHT POLES IN THE NARRAVILLE AND KUISEBMOND SUBURBS (WALVIS BAY)

Dear Valued Customers

Kindly be informed that Erongo RED has embarked on an exercise of replacing old High Mast light poles with new ones in the Narraville and Kuisebmond suburbs. After the strong east-wind conditions that were experienced in June 2022, Erongo RED identified eighteen (18) light poles that needed to be replaced. In order to avoid infrastructural damages and to prevent loss of lives, eleven (11) of the identified light poles were removed immediately as they posed a great threat to these communities.

The High Mast light poles that still need to be replaced are located in the following streets:

Narraville Suburb:

- Plein Street - Next to Narraville Primary School
- Tamarisk Street - Next to De Duine High School
- Corner of Malva and Evergreen Street
- Corner of Cuckoo and Starling Street
- Seewier Street
- Lark Street

Kuisebmond Suburb:

- Frankie Abrahams Street
- Sandfontein Street - Next to the Methodist Church
- Riethaan Street - Next to the Riethaan Substation
- High Mast light pole behind Shop 4 Shopping Centre

The exercise is expected to be completed in September 2022. During this exercise, community members residing in these areas will have minimal supply of light. Thus, your vigilance, patience and understanding is required until the completion of the exercise.

Our sincere apologies for the inconvenience that this exercise may cause.
